**Cygnus®
Eco**

Manufactured in the heart of Sweden, **Cygnus® Eco Board** is the world's leading environmentally friendly, 100% fibre based board. Resistant to water and moisture, it is perfect for temporary outdoor signage and short term moisture sensitive signage and packaging. **Cygnus® Eco Board** is an ideal alternative to soft foam boards, foam PVC, fluted polypropylene, PE coated materials, HIPS and other plastic composites - even aluminium composite!

Cygnus® Eco Board is FSC® certified and a perfect fibre-based alternative to plastic.

Cygnus® Eco Board Lite is available in 310, 430 and 520 micron, and **Cygnus® Eco Board Ultra** is available in 830, 1250, 1500 and 2200 micron. Both are available in sheet sizes from 450x640mm up to 1700x3600mm. Bespoke sizes are available upon request.

Key benefits vs plastic:

- Fully recyclable – easily recycled and reused, in-fact it can be recycled up to 8 times!
- Compostable and Biodegradable - can be disposed of in normal paperboard waste stream.
- Outstanding print results - suitable for offset, screen and flatbed digital print techniques.
- Exceptional ink adhesion - smooth print surface means that when compared to fluted polypropylene, there is no flute shadow.
- Superior conversion results - can be digitally or die cut.
- Recycled content - made from up to 70% recycled content (depending upon calliper).
- FSC certified - Chain of Custody certification gives complete peace of mind.

**Outdoor sign? Forget plastic,
Choose Cygnus® Eco Board!**
